Research interests: human-centred and explainable AI, human–AI decision support, and technology that helps people learn and build lasting habits.

EDUCATION

Sabancı University, Istanbul, Turkey — Sep 2023 – Jun 2028 (expected)
BSc Computer Science and Engineering · Double Major in Economics · Minor in Finance

- Cumulative GPA **3.96 / 4.00** (October 2026) · High Honor list in every graded semester (5 of 5).
- Half scholarship awarded for academic excellence.
- Relevant coursework (all grade A): Advanced Programming, Programming Fundamentals, Linear Algebra, Introduction to Probability, Discrete Mathematics, Calculus I–II, Decision Economics, Games and Strategies. In progress: Data Structures, Database Systems, Logic and Digital System Design.

Wageningen University & Research, Wageningen, Netherlands — Spring 2026
Erasmus+ exchange semester

- Coursework (all grade A): Software Engineering, Data and AI Ethics, Statistical Modelling, Data Management.

PUBLICATIONS

[1] **G. İnan**, K. E. Bennin, B. Tekinerdogan, A. C. Adalı, S. Farshidi. HugSelect: An evidence-driven multi-criteria decision-support tool for Hugging Face model selection. *SoftwareX*, *in minor revision*, 2026. Software and reproducibility package: doi.org/10.5281/zenodo.22210820.

RESEARCH EXPERIENCE

Student Researcher — Summer 2026 – Present
Information Technology Group · Wageningen University & Research — Wageningen, Netherlands
Supervisors: Dr. Siamak Farshidi, Dr. Kwabena Ebo Bennin, Prof. Dr. Bedir Tekinerdogan

- Developed HugSelect, an open-source Django decision-support system that turns a natural-language request and MoSCoW priorities into structured criteria and ranks candidates from an Elasticsearch snapshot of 69,000 Hugging Face models.
- Built explainable views for human–AI model selection: criterion-level explanations, relation graphs, side-by-side comparison, “Decision Stress” sensitivity analysis across five priority configurations, and PDF decision records.
- Validated the release for reproducibility: 178 automated tests, exact snapshot restoration, Docker end-to-end runs, and a public evaluation package (20 scenarios, 120 run records) archived on Zenodo.
- First author of the resulting journal paper: wrote the original draft and revisions and produced the figures.

SELECTED PROJECTS

Momentum Grids — founder and developer — Jul 2026 – Present

Habit-tracking iOS app and web service — momentumgrids.com · App Store

- Designed, built and released an iOS habit tracker that shows each habit as a year-long grid; public on the App Store since September 2026, with regular updates.
- Native SwiftUI client with widgets, Live Activities, Siri shortcuts and offline sync, backed by a Django REST API and PostgreSQL shared with the web app; StoreKit 2 subscriptions verified on the server; Sign in with Apple and Google.
- Behaviour-change and accessibility design: progress without fragile streaks (days can be frozen for illness or travel), personal rewards, Dynamic Type and VoiceOver support, English and Turkish localisation. 1,800+ automated tests and CI-gated releases.

SmartCalendar — collaborative scheduling application — Spring 2026

Team project · Software Engineering course · Wageningen University & Research — Java

- Built a multi-user scheduling system that finds suitable meeting times from shared calendars, with invitations, notifications, authentication and role-based access.

Personalised 3D-printed shoe insoles — Spring 2025

Undergraduate project · Sabancı University — Rhino3D, Grasshopper, LiDAR

- Turned LiDAR foot scans into parametric insole models, using lattice structures to tune pressure distribution, and 3D-printed the prototypes.

TEACHING AND LEADERSHIP

Group Leader, UniMates — Oct 2025 – Jan 2026

- Led a student initiative that helps incoming students adapt to university life; organised social events and ran the group's communication channels.

Student Volunteer, Civic Involvement Projects, Sabancı University — Feb 2024 – Jun 2024

- Designed and taught interactive activities and small projects for primary-school students on global and everyday topics.

SKILLS

Programming	Python, Swift, Java, C++, SQL, R
AI and data	Hugging Face Hub, Elasticsearch, statistical modelling in R, data management
Software	Django and Django REST Framework, SwiftUI, PostgreSQL, Docker, Git, GitHub Actions, automated testing, AI-assisted development (Claude Code, Codex)
Design	Rhino3D, Grasshopper, 3D printing, ArcGIS Pro
Languages	Turkish (native), English (C1), German (A2)

CERTIFICATES AND INTERESTS

Certificates: CS50's Introduction to Programming with Python (Harvard University); Financial Markets (Yale University, Coursera).

Interests: technical writing at gokdenizinan.com; music (trumpet, guitar, piano); Latin dance; ultimate frisbee (Sabancı Seahawks, 2024–25).
